MEMORANDUM FOR: GENERAL COUNSEL

SUBJECT: Sources of Specialized Manpower

1. To meet current manpower requirements and prepare for orderly expansion under either cold or hot war conditions, this office is preparing to locate and establish contacts with all profitable sources of specialized manpower. This will be of immediate and continuing value to you because we shall be able to provide a larger number of better qualified candidates for your vacancies.

2. In launching this program it is first necessary to compile a concise list of specialized requirements and then to identify and develop profitable sources through individual contacts, groups, and organizations. A simple but effective plan has been devised for eliciting and organizing this information but it will require expert advice in the respective fields. In view of the urgency and importance of this undertaking, I would appreciate it if you or your Deputy would confer briefly with my representative, [REDACTED] as your personal support is required.
